Skills for Tomorrow's World 

Course Description

Course Overview

The **Emerging Technologies and Innovation in Government** course is a comprehensive, theory-driven program designed to help public sector managers and emerging leaders understand how new and disruptive technologies are reshaping government operations, service delivery, and policy implementation. As governments worldwide face increasing pressure to modernize, innovate, and respond rapidly to citizen needs, leaders must be equipped with a clear conceptual understanding of emerging technologies and their strategic implications.

This course is especially valuable for first-time managers and supervisors who are expected to contribute to innovation initiatives, digital strategies, or transformation programs without necessarily having a technical background. Positioned within **leadership training for new managers**, the program focuses on strategic awareness, governance considerations, and leadership decision-making rather than technical deployment. Participants gain a structured perspective on how innovation can be responsibly adopted in government environments to enhance efficiency, transparency, and public value.

Key Outcomes

By the end of this program, participants will be able to:

- By the end of this program, participants will be able to explain key categories of emerging technologies relevant to government.
- By the end of this program, participants will be able to understand how innovation supports public sector modernization.
- By the end of this program, participants will be able to identify leadership responsibilities in technology-driven change.
- By the end of this program, participants will be able to assess opportunities and risks associated with new technologies.
- By the end of this program, participants will be able to contribute to informed discussions on innovation initiatives.

programs.

- By the end of this program, participants will be able to understand governance and ethical considerations of emerging technologies.
- By the end of this program, participants will be able to strengthen leadership readiness for future-focused initiatives.

Who Should Attend

This course is designed for professionals in government and public sector organizations who are involved in leadership, planning, or coordination of innovation and technology-related initiatives, including:

- First-time managers and newly appointed supervisors
- Team leaders and section heads
- High-potential employees preparing for leadership roles
- Middle managers involved in transformation programs
- Policy and strategy professionals
- Business owners of innovation or modernization initiatives

Prerequisites: No prerequisites.

Course Outline by Modules

Day 1: Understanding Emerging Technologies in Government

- Overview of emerging technology trends affecting the public sector
- Why governments must monitor and understand new technologies
- Differences between traditional systems and emerging solutions
- Strategic relevance of innovation awareness for managers
- The role of leadership in technology foresight

Day 2: Innovation Concepts and Public Sector Value

- Defining innovation in a government context
- Types of innovation: service, process, and organizational
- Public value creation through technology-enabled innovation
- Barriers to innovation in government organizations

- Evaluating innovation initiatives at a managerial level
- Prioritization and resource considerations
- Avoiding technology-driven decisions without clear value
- Leadership roles in steering innovation direction

Day 4: Governance, Risk, and Ethical Considerations

- Governance frameworks for innovation and technology adoption
- Managing risks associated with emerging technologies
- Ethical, legal, and accountability considerations
- Transparency and public trust in innovation initiatives
- Leadership oversight and responsible decision-making

Day 5: Building an Innovation-Ready Organization

- Organizational culture and innovation readiness
- Cross-department collaboration and knowledge sharing
- Developing innovation capabilities over time
- Measuring innovation impact at a high level
- Sustaining innovation through leadership commitment

Methodology

The **Emerging Technologies and Innovation in Government** course is delivered using a primarily theoretical and structured methodology. The focus is on concepts, leadership frameworks, and strategic understanding rather than technical implementation or hands-on system configuration. This approach makes the course highly suitable for **first-time manager training, management skills training**, and broader leadership development programs.

Learning is facilitated through instructor-led explanations, guided discussions, and simplified public sector scenarios that help participants contextualize emerging technologies within their own organizations. Interaction takes place at both individual and group levels through light discussions and reflection exercises. Practical activities are intentionally minimal and may include short quizzes, basic innovation readiness checklists, or simple decision-mapping templates completed on a computer. Training materials include summary sheets, a

Participant understanding is assessed during the training through short quizzes, guided question-and-answer sessions, and recap discussions at the end of each day. These in-session assessments are designed to reinforce learning outcomes without formal examinations or complex assignments.

Organizations may independently evaluate return on investment through internal performance indicators such as improved quality of innovation proposals, stronger managerial participation in transformation initiatives, enhanced collaboration, or leadership performance reviews. **Internal measurement is managed by the client organization and is outside the scope of our delivery.** Optional follow-up support or advisory discussions may be arranged upon request.

Instructor Profile

Instructor assignment depends on the delivery date and city. We work with a global pool of trainers. Please contact us to confirm the most suitable available instructor for this course based on schedule and location.

Conclusion

The **Emerging Technologies and Innovation in Government** course equips managers and emerging leaders with the strategic awareness and leadership perspective required to navigate a rapidly evolving technological landscape. As part of a **new manager leadership course, leadership fundamentals course, or supervisor leadership program**, this training strengthens confidence, governance awareness, and innovation readiness. Organizations seeking effective **leadership development for team leaders**, practical **management skills training**, and a recognized **certificate of completion** are invited to contact us to tailor the delivery format—onsite, online, or blended—with flexible duration options aligned to public sector priorities.
